NIH	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023
	\$86.4	\$91.1	\$96.4	\$103.8	\$113.5	\$115.7	\$123.5	\$129.0	\$134.5	\$137.2	\$141.9	\$141.0	\$140.6	\$141.3	\$143.8	\$143.6	\$150.2	\$159.7	\$159.3	\$167.2	\$174.8	\$179.7	\$186.2	\$194.1

1/ The name of the National Center for Complementary and Alternative Medicine (NCCAM) was changed to the National Center for Complementary and Integrative Health (NCCIH) in FY 2015 per the Consolidated and Further Continuing Appropriations Act of 2014 (PL 113-235). The table indicates NCCIH replacing the NCCAM abbreviation consistent with the FY 2016 actual results update.

2/ Excludes statutorily exempt FTEs funded through Cooperative Research and Development Agreements (CRADAs) from FY 2002 through FY 2008. CRADA funded position FTE are tracked beginning in FY 2009.

3/ PHS Trust (Gift) Fund and CRADA-financed positions are reported within the IC direct FTE lines by the HHS Business Intelligence Information Systems (BIS). CRADA and PHS are, therefore, now identified as non-add entries. The exception to non-add treatment of PHS Trust Fund FTE is in FY 2013 with the 4 FTE are additive.

4/ The FY 2012 NIH Congressional Justification (CJ) FTE table identified the total FY 2010 actual usage at 18,362 versus the BIS reported figure of 18,351 primarily due to the additional reporting of CRADA as PHS in FY 2013.

5/ The FY 2013 NIH CJ FTE table identified the total FY 2011 actual usage of 18,569, however the IC distribution reflected in that CJ has comparability adjustments retroactively account for the assumed effect of the NCATS reorganization. The IC distribution in this table reflects actual results as reported by BIS for FY 2011 respectively.

6/ Excludes FTEs for the Advanced Research Projects Agency for Health (ARPA-H) in FY 2022 and FY 2023.

7/ The average annual FTE cost includes total compensation and benefits (object classes 11 and 12). Benefits for former personnel are excluded (object class 13) as a non-recurring cost from the calculated average. Earlier versions of this table indicated average cost for FTE inclusive of benefits, however, the numeric values displayed identified annual average salary, which did not include benefits or non-salary forms of compensation.

5/ The FY 2012 NIH Congressional Justification (CJ) FTE table identified the total FY 2010 actual usage at 18,362 versus the BHS reported figure of 18,351 primarily due to the additional reporting of CRADA as PHS in FY 2013.

6/ The FY 2013 NIH CJ FTE table identified the total FY 2011 actual usage of 18,569, however the IC distribution reflected in that CJ has comparability adjustments to retroactively account for the assumed effect of the NCATS reorganization. The IC distribution in this table reflects actual results as reported by BHS for FY 2011 respectively.

7/ The average annual FTE cost includes total compensation and benefits (object classes 11 and 12). Benefits for former personnel are excluded (object class 13) as a non-recurring cost from the calculated average. Earlier versions of this table indicated average cost for FTE inclusive of benefits, however, the numeric values displayed identified annual average salary, which did not include benefits or non-salary forms of compensation.
